Professional Summary

Application systems and operations support professional with 3+ years of experience across software development, administrative coordination, management reporting, data validation, and workflow improvement. Hands-on experience with Excel/VBA, Google Workspace, Notion, Google Apps Script, cross-functional coordination, and process documentation, supported by current projects in automation and productivity systems. Brings a technical problem-solving mindset to organized, detail-sensitive administrative, operational, and executive support work.

Technical & Administrative Skills

Core Tools: MS Excel (Advanced VBA/Macros), Google Workspace, Microsoft 365, Notion, Google Apps Script

Automation & Platform Familiarity: Make (Certified), Zapier (Certified), Hostaway, Breezeway, Conduit

Functional Skills: Administrative Support, Executive Support, Management Reporting, Data Management & Validation, Process Documentation, Task & Project Tracking, Cross-functional Coordination, Workflow Design, Calendar & Scheduling Fundamentals

Creative Tools: Adobe Photoshop, Adobe Lightroom, DaVinci Resolve

Projects & Professional Development

Automation & Systems Projects • April 2026 - Present

- Designed and built **Secretary Jihyo**, a personal Gmail and Telegram automation system using Google Apps Script to organize incoming email and deliver scheduled reports, reminders, and command-based inbox actions.
- Conceived, designed, and released **YOINK**, a Windows productivity application that extracts and restructures long AI conversations into portable project context, with configurable splitting, preview and scratchpad workflows, automated testing, and portable packaging.
- Built and maintain a **Notion productivity workspace** for knowledge management, project and task tracking, and job-application tracking; completed certified training in Make and Zapier to deepen no-code automation and workflow-design skills.

Professional Experience

Mid Developer • January 2025 - April 2025

Fujitsu - WeServ Systems Int'l Inc.

- Completed Java development and **JUnit testing assignments** for an ongoing enterprise system by working from bridge-translated Japanese specifications, resolving reviewer findings, and carrying assigned tasks through final approval.
- **Supported maintenance, modification, migration, testing, and troubleshooting** in a secure offline development environment, coordinating with bridge engineers when requirements needed clarification.

Administrative Lead • October 2024 - December 2024

Fujitsu - WeServ Systems Int'l Inc.

- **Coordinated company compliance requirements** across managers, project teams, and members by tracking submissions, validating records, following up on missing items, and helping raise tracked completion from roughly 40% to full compliance.
- **Maintained and compiled Excel/VBA-based resource and pool reports** for local and regional management, consolidating data from multiple teams to support staffing and deployment decisions.
- **Gathered, verified, and reconciled project records, case studies, and compliance data** across shared repositories, working with responsible personnel to resolve missing or incorrect information before management reporting.

Junior Developer - VBScript/VBA Project • January 2024 - September 2024
Fujitsu - WeServ Systems Int'l Inc.

- **Developed VBScript automation** to process batches of Java source files, applying repeatable client-specified changes to targeted functions and values across large codebases while preserving unaffected code.
- **Built an Excel VBA/macro interface** for a later project cycle, enabling Java files to be processed through the same core workflow against updated client specifications.
- **Performed validation checks** to confirm automated changes were applied only to specified code locations before delivery.

Junior Developer - Java Application Project • July 2022 - December 2023
Fujitsu - WeServ Systems Int'l Inc.

- **Contributed from project inception** to the design and development of a Java-based client application, expanding the solution through successive releases as part of the original team that earned a **Best Project Award**.
- **Developed a hierarchical checklist workflow** that imported client Excel data, handled inconsistent source formatting, organized nested items into a structured interface, and preserved user selections and history across sessions.
- **Contributed to a 40% increase in quarterly task completion** through continued development and workflow improvements while keeping delivery within project man-hour estimates.
- **Received a 120% individual productivity score** in manager performance review and transitioned from trainee to Junior Developer after completing a 90-day bootcamp before being selected for a long-term client assignment.

Registration Officer I • October 2021 - December 2021
Philippine Statistics Authority

- **Supported the early PhilSys rollout** across assigned barangays by locating pre-approved registrants, coordinating with local officials, conducting door-to-door outreach, and helping registration sites meet daily quotas.
- **Verified identification and supporting documents** before registration, rejecting incomplete applications when necessary to maintain accurate and compliant applicant records.
- **Managed high-volume registration sites and field logistics**, including queue coordination, site setup, travel to remote communities, and coordination with barangay officials to reach eligible residents.

Certifications

- EF SET English Certificate: C2 Proficient - March 2026
- Make: Foundation, Basic - April 2026
- Zapier: Building Basic Zaps, Building Intermediate Zaps - April 2026
- Microsoft Certified: Azure Fundamentals - June 2022

Education

- Bachelor of Science in Electronics Engineering, March 2019
- University of St. La Salle - Bacolod, Negros Occidental
